Introduction

SDG No. 13: Climate Action: Aims to combat climate change and its impacts .

Problem:	Climate change and environmental degradation due to deforestation in Kenya's forests, threaten local ecosystems. Despite awareness, efforts to combat deforestation and promote reforestation often lack effective public engagement, transparency, and accessibility.
Solution:	The Kenya Forest Trust app promotes tree planting and reforestation efforts by leveraging donations, providing project tracking, offering educational resources, and engaging the community, making a significant impact in the fight against climate change.

Website Overview

- **Home Page:** Welcoming visitors with an overview and interactive map.

- **About Us:** Detailed information about our mission, vision, and team.

- **Projects:** Current and past reforestation projects.

- **Events:** Upcoming and past events related to tree planting and community engagement.

- **Donations/Support:** Options for sponsoring a tree and supporting our cause.

- **Privacy Policy:** Ensuring the protection of user data and transparency in our operations.

Call to Action

Interactive Map

- Created using Folium to visualize forest areas.

- Markers for major forests: Kakamega, Mau, Aberdare, Mt. Kenya.

- Users can explore forest locations and learn about specific projects.

Donation / Support

Kenya Forest Fund by use Green A.I. aims to restore forest coverage and combat climate change through reforestation. Your donations help us buy and plant seedlings, allowing you to contribute to this vital cause from the comfort of your home, office, or social gathering. Join us in making a difference!
